

ADEX

The Easy Way to Make the Orchestrator Work for You

ADEX from ACBM provides a quick and easy way to create dynamic integrations for data management and process automation via the JDE Orchestrator.

SIMPLE SYSTEM REQUIREMENTS

- Microsoft Excel 2010 and above
- Microsoft Windows 7 SP1 and above
- Requires JDE EnterpriseOne Orchestrator and AIS server
- JDE Apps Release 9.0 or above
- JDE Tools Release 9.1.5.5 Minimum, (Recommended 9.2.0 or above)

No additional servers or IT infrastructure required. Installation/setup takes less than 5 minutes.

The screenshot shows the ADEX Excel interface. The top ribbon includes 'Orchestrations', 'Refresh Worksheet', 'Create Template', 'Consolidate Multiple Outputs', 'Fire and Forget', 'Assertions', 'Stop On Error', 'Refresh Orchestrations', 'Refresh Cache', 'Call', 'Call Multiple', 'Stop Load', 'Autofill Header/Detail', 'AIS Server Connection', 'Info', 'Config', 'Attach Log', 'Attach Workbook', and 'Contact Support'. The main area displays a data table with columns for 'Exclude Row (Y or blank)', 'Address Number', 'Alpha Name', 'Search Type', 'Address 1', 'Address 2', 'Address 3', 'Address 4', 'City', 'State', 'Zip Code', 'Payment Instrument', 'Pay Terms', 'Status Code', 'Date/Time Updated', 'String Alpha Name', 'String JDE Assigned Number', 'String Vendor Added', and 'Boolean Customer Added'. A dialog box is open over the table asking 'Are you sure you want to submit worksheet (sheet1)?' with 'Yes' and 'No' buttons.

Exclude Row (Y or blank)	(String) Address Number	(String) Alpha Name	(String) Search Type	(String) Address 1	(String) Address 2	(String) Address 3	(String) Address 4	(String) City	(String) State	(String) Zip Code	(String) Payment Instrument	(String) Pay Terms	Status Code	Date/Time Updated	String Alpha Name	String JDE Assigned Number	String Vendor Added	Boolean Customer Added

USER FRIENDLY FEATURES

- Automatically discovers and integrates with all existing and new orchestrations
- Familiar Excel interface
- Easy to understand Error Handling and logging
- Integrated return values
- Support for Header/Detail applications (Grids)
- Support for Attachments (Media Objects)
- Support for Assertions (Automated Testing)

COMMON USES

- Uploading/managing master & transactional data
- Automating business processes for individuals & departments
- Testing & debugging new orchestrations
- Converting/migrating data after a merger or acquisition
- Execute Queries

No costly upfront fees or ongoing customization charges: Affordable subscription price for individual or multi-user licenses.

Work With Addresses
